

"Providing a simple, secure tool that saves time for medical researchers".

Why Data Quality Matters?

Clinical research is a long process that follows strict protocols. To ensure valid results, patient data collected over months or years must remain complete, consistent, secure and traceable.

Limits of Current Tools

Many teams still rely on manual Excel sheets, causing errors and time loss. These tools lack collaboration, security and flexibility, making them unsuitable for evolving research needs.

Our Approach: MedDataCollect

MedDataCollect is a secure platform with dynamic forms that ensure reliable and consistent data. It automates anonymization and compliance to provide clean, export-ready datasets.

Our Architecture

How Researchers Use It ?

1. Promoter (Researcher) creates the form

Source :
PNGTree

3. The system anonymizes the data.

Project Roadmap

SEP 2025

OCT 2025

SPRINT1

NOV 2025

SPRINT2

DEC 2025

SPRINT3

JAN 2026

Kick-off meeting

Mid-project meeting

Poster presentation

Final meeting

Project delivery

- State of art, Research on GDPR compliance,
- Brainstorming
- Technological choices

- Requirements specification
- Definition of the project architecture and environment

- Authentication and login
- Form creation
- Messaging system
- Testing

- CSV form exports
- Form anonymization
- Enhanced security
- Code optimization
- Testing
